

Harmonic Enables DIRECTV to Reimagine Nationwide DTH Service

April 19, 2026

Harmonic's Cloud-Native VOS Media Software Lowers Costs by Unifying Media Payout to Delivery on a Single Platform

SAN JOSE, Calif., April 19, 2026 /PRNewswire/ -- Harmonic (NASDAQ: HLIT) today announced that DIRECTV is transforming its U.S. direct-to-home (DTH) video platform with Harmonic's VOS® Media Software. Powering DIRECTV's payout-to-delivery workflow, Harmonic's cloud-native software reduces operational costs while enabling scalable, exceptional-quality video delivery for the service provider's vast array of linear channels.

"As the demand for high-quality media content soars, DIRECTV is committed to deploying innovative technology solutions that bring unparalleled entertainment experiences to our customers. Continuing our work with Harmonic is critical to achieving this mission," said Jeffrey Seto, vice president of satellite and software engineering at DIRECTV. "Harmonic's VOS Media Software replaces siloed systems with a unified, software-based platform. By centralizing advanced payout, ad insertion, branding and media processing, we're simplifying operations and building a scalable foundation."

Harmonic's VOS Media Software enables a complete payout-to-delivery workflow for DIRECTV running in its private data center. The Harmonic solution handles ingest, advanced payout, ad insertion, branding, premium encoding and statistical multiplexing for the delivery of broadcast-quality linear channels via satellite distribution. VOS Media Software's payout capabilities support ad insertion across DIRECTV's high-value linear and occasional-use channels — including live events and pay-per-view programming — boosting monetization. DIRECTV's internal automation, storage and monitoring systems are integrated directly with Harmonic's APIs, enabling seamless control of scheduling, automation and channel operations.

"Harmonic is proud to support DIRECTV's software-based approach in modernizing its payout-to-delivery operations," said Gil Rudge, senior vice president, solutions and Americas sales, video business at Harmonic. "With Harmonic's AI-driven encoding and advanced compression solution, DIRECTV is well positioned to deliver exceptional video experiences to viewers across their linear channels, optimizing quality while minimizing bandwidth usage and operational costs."

Harmonic will showcase its VOS Media Software at the 2026 NAB Show, April 19-22, in Las Vegas in booth W2831. About Harmonic

Harmonic (NASDAQ: HLIT), the worldwide leader in virtualized broadband and video delivery solutions, enables media companies and service providers to deliver ultra-high-quality video streaming and broadcast services to consumers globally. The company revolutionized broadband networking via the industry's first virtualized broadband solution, enabling operators to more flexibly deploy gigabit internet services to consumers' homes and mobile devices. Whether simplifying OTT video delivery via innovative cloud and software platforms, or powering the delivery of gigabit internet services, Harmonic is changing the way media companies and service providers monetize live and on-demand content on every screen.
